INSTRUCTIONS:

This is a closed-book, closed-notes test. You may use only the following items:

- Two 3-by-5-inch cards of handwritten notes.
- A scientific calculator.
- A pencil or pen.

The following items may not be used: additional note cards, additional notes, phones, computers, portable music players, other electronic devices, and other resources of any kind.

All forms of collaboration are prohibited during this test. You may communicate only with the person administering the test, and you may not receive or give aid of any kind.

Write your name in the space provided at the top of this page and on the answer sheet (next page).

Do not separate or remove any of the pages of this test. All pages must be returned to the instructor at the conclusion of the test.

Select the best answer for each problem by drawing a circle around the letter of the correct choice on the answer sheet. Circle only one letter for each problem, and do not make any additional marks on the answer sheet.

Each problem is worth five points. Credit for a problem will be awarded only if the correct letter is circled on the answer sheet. No credit will be awarded if more than one answer is selected.

You may work each problem in the space following the problem statement, but no credit will be given for this work. There should be adequate room for all work on the front of each page, but you also may write on the back or on extra sheets provided by the instructor.
